

Online Game Embedding Instructions

Interested in including the online version of Finances 101 on your credit union's website? If you manage the website, this can be done with only a couple steps. This does require a little experience with editing HTML, but by no means do you need to be an expert.

- 1) Pick the place on your website you would like to place the game
- 2) Find the corresponding place in the html file for that page and use your text editor to select the placement
- 3) Copy the following code:

```
<span class="media" id="mygame"><script src="http://www.wgte.org/finances101/player/?div=mygame" type="text/javascript"></script></span>
```

- 4) Paste the copied code into the location in your html file that you selected in step 2
- 5) Save your file
- 6) Enjoy the game, now featured on your credit union's website

If you have any questions or issues regarding the process, or `<script>` tags are not allowed in a content management system you are using, please contact Clinton LaForest at WGTE Public Media. His email is clinton_laforest@wgte.org.

Advanced Instructions:

If for some reason you cannot use a `<script>` tag, try copying and pasting this code:

```
<object width="750" height="550" type="application/x-shockwave-flash" data="http://www.wgte.org/finances101/game/loadfirst.swf" id="mygame" style="visibility: visible;"><param name="menu" value="false"><param name="quality" value="high"><param name="allowScriptAccess" value="always"><embed src="http://www.wgte.org/finances101/game/loadfirst.swf" quality="high" width="750" height="550" name="mygame" type="application/x-shockwave-flash" pluginspage="http://www.macromedia.com/go/getflashplayer"></object>
```
